3 - What are some specific things your instructor does that help you learn in this course?

Jennifer Parker

Response Rate	10/15 (66.67%)

• Trying to make everything as connected as possible, not making every week's discussions mandatory, allowing for webinar reflections in lieu of reading discussions.

• She was consistent in her displaying of information and where to find assignments. She started each week off with a well detailed announcement/email that allowed me to plan out my learning week. She was easily accessible to her students and was quick to answer emails and questions.

• Feedback on assignments whether it's offering perspective or corrective measures. Very useful in the completion of assignments.

• Dr. Parker is always, always, always willing to meet with her students one-on-one so they fully understand what they need to do. She is always prompt in her email correspondence and is actually excited when her students reach out to her. She leaves feedback that shows she actually read through our work and sparks further thinking through her feedback. She is passionate about this work and shows it through her interactions with her students. I appreciate her willingness to grant extensions, even if they are only by a couple of hours.

• The course was clearly laid out with clear expectations.

• Dr. Parker was really great about getting back with me on my projects and leaving comments and suggestions. She is professional and fair. This is the second class I have taken with her and I hope to have more. I have learned more in this eight week course than I had anticipated simply because it was a shorter session. I LOVED this class and know that I will utilize the course content regularly.

• I was not sure about the final project topic. I asked questions and she had clarified everything very nicely.

• Dr. Parker was organized, empathetic and thoughtful in everything she did. She offered timely and effective feedback on all assignments and was always ready and willing to talk or meet whenever necessary. She is very approachable, knowledgeable and enthusiastic about the subject matter and the learning and experience of the students.

• The class Bb shell was very descriptive. Instructor was always available for communication.

• Constantly available and very responsive. Provides specific feedback and welcomes alternatives.

4 - What are some specific things your instructor does that hinder or interfere with your learning?
Jennifer Parker

Response Rate	8/15 (53.33%)

- There was a lot of reading and discussion posts in addition to the work load (maybe it was just the time of year, too)
- Nothing.
- Overall, I felt that there was nothing that hindered the learning process.
- Nothing, really. Dr. Parker facilitates deep-thinking conversation and provides feedback in a timely manner, which are both key factors in my personal success.
- n/a
- Nothing.
- The initial class was a little overwhelming. I would have liked to have another meeting to discuss the assignments after we got into the groove of things.
- n/a

5 - Please give your instructor some practical suggestions on ways to improve your learning in this course.
Jennifer Parker

Response Rate	7/15 (46.67%)

- Keep the same weekly format, as it was very easy to navigate and manage while teaching full time.
- I enjoyed the Flipgrid discussions best and would maybe suggest those as the discussion board options and then have the written assignments.
- I would suggest making sure all dates are correct before publishing the course. I know Dr. Hicks created the shell and Dr. Parker was teaching this course for (maybe?) the first time, and she did change most of the dates, but that caused some confusion. I also would have liked to know more about the final project before beginning our assignments, because it would've helped to know that parts of those smaller assignments would be components of our final project. I would make sure that is explicitly clear from the get-go.
- I really enjoyed this class. This was a lot of information presented in a short time frame, along with the class assignments, I felt that it was a little overwhelming. I also thought meeting with the accountability partner was a little anxiety-inducing on top of all of the assignments and reading. Is it possible that this class can be presented in 16 weeks, or eliminate some of the elements of the course.
- I personally would have loved to have another zoom session in this course just because I loved it. I appreciated the schedule change since we were all working in different areas. You allowed us the freedom to change our projects as we evolved in our own understanding of the content. Thank you!
- I feel this course is very well structured and Dr. Parker is always helpful to explain any doubts.
- It was unclear to me until the last week whether or not the project planning template was something that had to be turned in and if so, what the expectations were for the final product of the template. I really enjoyed doing the analyses assignments however I think it would be helpful to move the journal analysis one week earlier to give more time to work on the project in the final two weeks. I know this would put the journal assignment the week right after the Ed Resource assignment, but I also think more time to focus solely on the project leading up to the deadline would have helped alleviate some of my stress - especially if this class runs during the holiday season again.
