3 - What are some specific things your instructor does that help you learn in this course?

Jennifer Parker

Response Rate 10/25 (40%)

- Dr. Parker was extremely patient and kind as I was learning to navigate my way through CMU. All the material delivered was exactly the ideas that I wanted to study here. My first class in this program introduced me to some amazing educators, as well. Bravo.
- The pace you led the class was PERFECT!
- Dr. Parker was always available for help. The instructions in the Tuesday talks were great.
- Good communication and comments on assignments were helpful. I appreciated the variety of options in each pathway.
- Great resources for exploring new tools. Feedback was specific and helpful.
- Dr. Parker was very understanding and flexible. I appreciated tremendously that we could access information on a site outside of blackboard and that the weekly meetings were recorded. I was unable to attend the meetings due to family and work commitments but was still able to access the information as needed. Having sample projects available for reference for some of the material was also helpful. It was helpful to have a lot of our assignments be pass/fail. I truly felt like I was heard and was able to just do assignments in a way that fit my class and my needs without having to fit them in to a mold that would just tick the boxes to help me get a good grade. That was really refreshing.
- She provides meaningful and timely feedback. Recordings of Tuesday sessions were accessible the next day--I had to miss one for a school event and I was able to watch it the next day.
- Dr. Parker was willing to help in any way she could. She made sure she her students were able to reach her if and when needed. She showed empathy and was very sincere. You can tell she loves what she does and wants her students to succeed.
- Provided live meetings to present material and answer questions. Provided timely feedback to assignments .
- Be open for questions, hold meetings, and stay transparent.

4 - What are some specific things your instructor does that hinder or interfere with your learning?

Jennifer Parker

Response Rate 8/25 (32%)

- None, the class met its objectives!
- The assignments on the external site are extremely wordy. I often found it difficult to understand the essence of the assignment and what the requirements were in order to complete it. It often took almost as long to read through and understand what we were being asked to do, than to complete the assignment itself. Several of the assignment instructions also had typos, which at time made understanding the directions more challenging.
- Nothing specifically instructor based comes to mind here.
- The assignment instructions were overly lengthy and wordy. I often spent more time trying to decipher what exactly I was supposed to be doing than completing the assignment itself.
- I would like clearer expectations for the assignments--the designer pathway was somewhat confusing on what was expected in the way of collaboration.
- Nothing comes to mine.
- There was nothing that hindered learning
- Not easy for non-K12 teachers to complete course. I had a lot of issues figuring out how to alter assignments to fit outside the classroom. Dr. Parker was helpful and flexible, however.

5 - Please give your instructor some practical suggestions on ways to improve your learning in this course.

Jennifer Parker

Response Rate 9/25 (36%)

- The only thing that was "misleading" was the suggested time it would take to complete assignments. Some assignments took 30 minutes, others over 6 hours. But honestly, you should keep them, it was still a good scale to suggest where you should aim to get to.
- Update the EDU 590 external site. Some of the links are dead or do not work. I also think some better instructions in the assignment areas are needed.
- A lot of the instructions included for assignments were unnecessary to actually completing the assignment. I think the instructions could be more concise and to the point.
- Having the website updated at the start of the course before sending to students. Multiple repeat/old assignments in the gradebook portion of blackboard was sometimes confusing. It would be helpful to have those cleared out before the course started. Times on the website for how long assignments would take seemed very underestimated compared to actual completion times.
- Be more concise and to the point in the assignments.
- I found the class website a little confusing. There is so much information about pathway and anchor assignments on each page that it would be helpful if it was formatted in bullet points or in a rubric.
- I would say the pacing regarding the due dates for the work load, but she was very accommodating and she did not have to be.
- Since I have not had too much prior knowledge with Ed tech maybe some more basic information that could help introduce information such as ISTE.
- I felt that the assignment instructions should have an alternate written document for non-teachers.
