3 - What are some specific things your instructor does that help you learn in this course?

Jennifer Parker

Response Rate 8/18 (44.44%)

- There is not one specific thing that Dr Parker does that helped me to learn, but several. Her humanistic approach to learning is refreshing. She is thoughtful, intentional and gracious and this helped me to relax and take time to reflect on my work. She was also always available and offered to meet one on one to discuss my paper.
- The Tuesday Open Forums were very helpful to get clarification on assignment directions.
- Here online talks were helpful in clarifying details and explaining the assignments.
- Better clarification on APA expectations for specific class related use.
- Words do not begin to describe what an amazing job Dr. Parker has done with instructing this class. The amount of confidence she provided me with her feedback was invaluable and has provided me the motivation to boldly continue along my path to attaining my MALDT degree. Having switched schools and degree programs, Dr. Parke,r along with the rest of the staff within the program, have provided me great support.
- Dr. Parker offered constructive feedback and suggestions on assignments that help me grow in my learning of the ISTE standards. She also was very understanding if we had questions or concerns and met or communicated with us in a timely manner.
- Dr. Parker did a great job of allowing u to align assignments and research to our current practice. It made this program way more accessible for those of us working full time and trying to balance life.
- Having the Tuesday Talks. It was very helpful getting together to go over the material, ask questions and connect with my classmates.

4 - What are some specific things your instructor does that hinder or interfere with your learning?

Jennifer Parker

Response Rate 7/18 (38.89%)

- There were a few times in the class assignment description where the instructions could have been outlined more clearly. Our Zoom meetings definitely helped so questions were answered.
- The website directions were not always clear with what was expected. Occasionally the links on the website were not updated or out of date.
- Written assignment directions were unclear or contradictory at times
- Nothing.
- I do not currently have any specifics that would all into this category.
- The organization of the assignments was a little confusing at times. Most of this was my fault for not reading thoroughly enough, but it sometimes felt like you would read a section with instructions, only to find another section with new details further down.
- Nothing, that I can think of. Dr. Parker is very helpful, understanding and supportive.

5 - Please give your instructor some practical suggestions on ways to improve your learning in this course.

Jennifer Parker

Response Rate 7/18 (38.89%)

- Looking back, I think an introductory Zoom meeting would have helped as an overview before the class began. Also APA 7 still is a hurdle for me!
- Adding video tutorials of the assignment directions may prevent confusion.
- Some of the assignments are written in confusing language. I struggled with understanding what they were asking, but the instructor did a great job of answering my questions and guiding along the way.
- Dr. Parker, the only suggestion I would provide is gaining alignment on the 7th edition APA standards with department heads. There were a few instances when 7th edition APA was followed but was criticized. For instance, in regard to the reference list in electronic sources, according to APA 7th edition, if the webpage doesn't have an author listed, you must include a retrieval date when the pages content is likely to change overtime, such as in the case of wiki articles and online periodicals with no DOI assigned. We were told that we shouldn't use retrieved by when citing an electronic source. This isn't always the case according to 7th Edition standards.
- I do not have any suggestions at this time.
- Really loved the flexibility and approach to student driven learning that this course had. I think I came in with a really broad view of what I wanted to accomplish and the class helped me focus in more on specific skills through projects that helped me in my current role.
- I can't think of anything that would improve the course. I wasn't entirely sure what the MALDT program entailed, but Dr. Parker did a great job explaining everything, and working with such a diverse class. I really enjoyed this course and am looking forward to the next courses in the MALDT program.
